

I just wanted to let you know that I am a truck driver and that XM Radio is the best thing a truck driver could have. XM got even better since they added the weather and traffic info to the line up because I can get the info I need when I need it and I don't have to listen to music, commercials, or talk shows I don't like in the first place.

If traffic is backed up around Chicago because of an accident or construction i can find out about it well before I get there and avoid the area and not add to the mess. With a local area radio station I would have to wait for who knows how long before I can get the info I need it.

I can't believe that the N.A.B. would waste the time of our Government with some thing like this when there are many other more important things that need to be done.

XM was a great service that has been made even greater by adding the Traffic and Weather and I feel it would be a big mistake to take away any part of the services that XM provides.

Think of it this way...if 800 trucks and/or cars or more can get the info they want before they get to a problem area such as an accident or construction and take a different route to avoid that area then wouldn't that help to save a life in that area by not adding to the problem??? Even if only 1 accident was avoided then the service is worth keeping.

Thank you for your time,

William N. Brewster.Jr.

P.S. If anyone reading this has XM Radio then you know what I'm talking about.
